PROGRESSIVE BONHAM.

SHE HAS LET A CONTRACT FOR ARTESIAN WELLS

To furnish 300,000 Gallons of Water Per Day—You Can't Keep a Good Town Down—The Railroad Interested.

Special to the Gazette.

BONHAM, FANNIN COUNTY, TEX., Nov. 28.—Bonham wants water and if progress and pluck can obtain this necessary article to the city's comfort. Bonham's city council will certainly get it. They have tried several schemes and failed, but success will ultimately crown their efforts. About two years ago they entered into a \$25,000 contract with professional well-diggers from Illinois to secure 150,000 gallons per day. The Illinois people were to bore an artesian well, reservoir the water and furnish pumps for its propulsion, and the city to furnish the piping. They bored 350 feet, and then failed to respond. Then to demonstrate that water could be got, the council gave the Texas and Pacific railway \$500 to experiment with a well. They sank a well about five hundred feet, struck the water, and then, on account of some chemical substance impregnating it, it will not mix with other water. It foams, like the action of seltzer powders, when mixed with other water. But the city council are still at it. Figuratively speaking, it might be said that they have water on the brain. Last month there came along a little fellow, reticent and retiring by disposition, accompanied by a gentleman who seemed to act in the capacity of an agent and interpreter. They rode in a buggy within a radius of two miles around Bonham. Huzzan is his name, and his success in finding water has led people to success in finding water which. He has found water at several places for the Texas and Pacific railway company, and his facility in tapping mother earth and getting results seems to be equal to that of the native Kentuckian in tapping a cask of bourbon for firewater. He told the Texas and Pacific to dig their big well in Fort Worth at the point it was bored. El Paso, Ector and other places have wells dug according to his direction. He has an electric pump which he claims to be affected by the presence of water, and he guards his machine with all the vigilance that a fairy would guard her wand. Some people fish and psalm. They say that any well-digger knows that a great deal of Texas is traversed by the artesian water belt, porous as a sponge, and all that you have to do is to tap it, and that by the principle that water seeks its own level it will come to the top. Mr. Huzzan doesn't talk much, but his agent acts for him. They said that water was around Bonham, and the city council immediately closed a \$15,000 contract with them, under which they are to commence work within thirty days, and in 120 days will have dug not less than one well nor more than five, guaranteeing 200,000 gallons a day. They are to furnish the pumps and casing and give a ten-day's test. Bonham will continue to be one of the leading points on the Transcontinental for years to come. The Texas and Pacific have leased a piece of ground near the depot for a number of years to Mrs. W. Y. Davis of the Alexander hotel. She is to build a \$4000 house upon this ground, and will control this character of trade from the railroad.

IMMIGRATION CONVENTION.

San Antonio Selected as the Place for the Great Gathering in January.

Special to the Gazette.

SAN ANTONIO, TEX., Nov. 28.—General Manager F. B. Chilton of the Southern Interstate convention today wired William A. Boyce, secretary of the commercial exchange of this city, that San Antonio had been selected as the place for holding the great immigration convention in January. It will be the largest convention ever assembled in the South, more than two thousand delegates being expected. San Antonio won over Louisville, Ky., Atlanta, Ga., Montgomery, Ala., Birmingham, Ala., Dallas, Tex., and New Orleans, La. Freeman was fined \$50. On appeal to the county court the case was decided in favor of Col.
